Globalization in Transition - CIO Journal. - WSJ
The notion of an “energy transition” emerged a few decades ago and refers to a structural change in energy systems. The aim of this transition is to shift from a production and consumption system based on non-renewable resources (oil, coal) to a system which incorporates green energies along with energy-saving measures and policies.

Challenges of the energy transition - Trade Finance Global
Nevertheless the transition of legitimate trade came with its problem of enslaving Africans on their own land cultivating cash crops which they needed as raw materials in their industries in Europe. These crops were bought cheaply or exchanged with valueless European products e.g. mirrors, glasses, used clothes. etc which made Africans ask themselves lamenting questions such as;
